INDEPENDENT AUDITORS' REVIEW REPORT TRANSLATED FROM CHINESE

To the Board of Directors and Shareholders of ACMEPOINT ENERGY SERVICES CO., LTD.

Introduction

We have reviewed the accompanying consolidated balance sheets of ACMEPOINT ENERGY SERVICES CO., LTD. AND SUBSIDIARIES (the "Group") as at September 30, 2025 and 2024, and the related consolidated statements of comprehensive income for the three-month and nine-month periods then ended, as well as the statements of changes in equity and of cash flows for the nine-month periods then ended, and notes to the consolidated financial statements, including a summary of material accounting policies. Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with "Regulations Governing the Preparation of Financial Reports by Securities Issuers" and International Accounting Standard 34, "Interim Financial Reporting" that came into effect as endorsed by the Financial Supervisory Commission. Our responsibility is to express a conclusion on these consolidated financial statements based on our reviews.

Scope of Review

Except as explained in the following paragraph, we conducted our reviews in accordance with the Standard on Review Engagements 2410, "Review of Financial Information Performed by the Independent Auditor of the Entity" of the Republic of China. A review of consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for qualified conclusion

As explained in Note 4(3), the financial statements of an insignificant consolidated subsidiary were not reviewed by independent auditors. Total assets of the subsidiary amounted to NT\$207,576 thousand and NT\$205,974 thousand, constituting 11% and 9% of the consolidated total assets as at September 30, 2025 and 2024, respectively, total liabilities amounted to NT\$348 thousand and NT\$0 thousand, constituting for less than 1% of the consolidated total liabilities as at September 30, 2025 and 2024, respectively, and the total comprehensive income amounted to NT\$(371) thousand, NT\$(6) thousand, NT\$(27) thousand, and NT\$(26) thousand, constituting for less than 1% of the consolidated total comprehensive income for the three-month and nine-month periods then ended, respectively.

Qualified Conclusion

Except for the adjustments to the consolidated financial statements, if any, as might have been determined to be necessary had the financial statements of certain consolidated subsidiaries been reviewed by independent auditors as described in the *Basis for qualified conclusion* section above, based on our reviews, nothing has come to our attention that causes us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of the Group as at September 30, 2025 and 2024, and its consolidated financial performance for the three-month and nine-month periods then ended and its consolidated cash flows for the nine-month periods then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, "Interim Financial Reporting" that came into effect as endorsed by the Financial Supervisory Commission.

Emphasis of matter

The Group acquired 97.09% share of A-Power Co., Ltd., a subsidiary of ACMEPOINT TECHNOLOGY CO., LTD.(the Group's ultimate parent Company), in the third quarter of 2025, and included A-Power Co., Ltd. as a consolidated subsidiary. As this equity transaction pertains to a reorganisation of entities under common control, A-Power Co., Ltd. shall be treated as if it had always been consolidated since the beginning. Thus, the Group has retrospectively restated the prior period consolidated financial statements when preparing the Group's third quarter of 2025 consolidated financial statements. Refer to Note 6(32) for details.

ACMEPOINT ENERGY SERVICES CO., LTD. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

NINE MONTHS ENDED SEPTEMBER 30, 2025 AND 2024(Restated)

(Expressed in thousands of New Taiwan dollars, except as otherwise indicated)

1. History and Organisation

Acmepoint Energy Services Co., Ltd. (the “Company”), was established on October 16, 2014, upon approval by the Ministry of Economic Affairs. The Company and its subsidiaries (collectively referred herein as the “Group”) are primarily engaged in sales, installation and development of Solar PV system, and provided relevant maintenance and operation services. The Company’s shares are traded in the Taipei Exchange starting from February 2, 2024. Acmepoint Technology Co., Ltd. holds 47.78% equity interest in the Company. Acmepoint Technology Co., Ltd. is the Company’s ultimate parent company.

2. The Date of Authorisation for Issuance of the Financial Statements and Procedures for Authorisation

These consolidated financial statements were authorised for issuance by the Board of Directors on November 13, 2025.

3. Application of New Standards, Amendments and Interpretations

(1) Effect of the adoption of new issuances of or amendments to International Financial Reporting Standards (“IFRS®”) Accounting Standards that came into effect as endorsed by the Financial Supervisory Commission (“FSC”)

New standards, interpretations and amendments endorsed by the FSC and became effective from 2025 are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IAS 21 ‘Lack of exchangeability’	January 1, 2025

The above standards and interpretations have no significant impact to the Group’s financial condition and financial performance based on the Group’s assessment.

(2) Effect of new issuances of or amendments to IFRS Accounting Standards as endorsed by the FSC but not yet adopted by the Group

New standards, interpretations and amendments endorsed by the FSC effective from 2026 are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Specific provisions of Amendments to IFRS 9 and IFRS 7, ‘Amendments to the classification and measurement of financial instruments’	January 1, 2026
Amendments to IFRS 9 and IFRS 7, ‘Contracts referencing nature- dependent electricity’	January 1, 2026

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
IFRS 17, 'Insurance contracts'	January 1, 2023
Amendments to IFRS 17, 'Insurance contracts'	January 1, 2023
Amendment to IFRS 17, 'Initial application of IFRS 17 and IFRS 9 – comparative information'	January 1, 2023
Annual Improvements to IFRS Accounting Standards—Volume 11	January 1, 2026
The above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.	

(3) IFRS Accounting Standards issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the IFRS Accounting Standards as endorsed by the FSC are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IFRS 10 and IAS 28, 'Sale or contribution of assets between an investor and its associate or joint venture'	To be determined by International Accounting Standards Board
IFRS 18, 'Presentation and disclosure in financial statements'	January 1, 2027 (Note)
IFRS 19, 'Subsidiaries without public accountability: disclosures'	January 1, 2027
Note : The FSC has announced in a press release on September 25, 2025 that public companies will apply IFRS 18 starting from the fiscal year 2028. Additionally, entities can choose to adopt IFRS 18 earlier based on their requirements after the FSC endorses IFRS 18.	
Except for the following, the above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.	
IFRS 18, 'Presentation and disclosure in financial statements' replaces IAS 1. The standard introduces a defined structure of the statement of profit or loss, disclosure requirements related to management-defined performance measures, and enhanced principles on aggregation and disaggregation which apply to the primary financial statements and notes.	

4. Summary of Material Accounting Policies

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

(1) Compliance statement

The consolidated financial statements of the Group have been prepared in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers", and the International Accounting Standard 34 'Interim financial reporting' that came into effect as endorsed by the FSC.

(2) Basis of preparation

- A. Except for the fair value through profit or loss and the financial assets at fair value through other comprehensive income, the consolidated financial statements have been prepared under the historical cost convention.
- B. The preparation of financial statements in conformity with International Financial Reporting Standards, International Accounting Standards, IFRIC® Interpretations, and SIC® Interpretations that came into effect as endorsed by the FSC (collectively referred herein as the “IFRSs”) requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group’s accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 5.

(3) Basis of consolidation

- A. Basis for preparation of consolidated financial statements:
 - (a) All subsidiaries are included in the Group’s consolidated financial statements. Subsidiaries are all entities (including structured entities) controlled by the Group. The Group controls an entity when the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Consolidation of subsidiaries begins from the date the Group obtains control of the subsidiaries and ceases when the Group loses control of the subsidiaries.
 - (b) Inter-company transactions, balances and unrealised gains or losses on transactions between companies within the Group are eliminated. Accounting policies of subsidiaries have been adjusted where necessary to ensure consistency with the policies adopted by the Group.
 - (c) Profit or loss and each component of other comprehensive income are attributed to the owners of the parent and to the non-controlling interests. Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.
 - (d) Changes in a parent’s ownership interest in a subsidiary that do not result in the parent losing control of the subsidiary (transactions with non-controlling interests) are accounted for as equity transactions, i.e. transactions with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity.
 - (e) When the Group loses control of a subsidiary, the Group remeasures any investment retained in the former subsidiary at its fair value. That fair value is regarded as the fair value on initial recognition of a financial asset or the cost on initial recognition of the associate or joint venture. Any difference between fair value and carrying amount is recognised in profit or loss. All amounts previously recognised in other comprehensive income in relation to the subsidiary are reclassified to profit or loss on the same basis as would be required if the related assets or liabilities were disposed of. That is, when the Group loses control of a subsidiary, all gains or

losses previously recognised in other comprehensive income in relation to the subsidiary should be reclassified from equity to profit or loss, if such gains or losses would be reclassified to profit or loss when the related assets or liabilities are disposed of.

B. Subsidiaries included in the consolidated financial statements:

Acmepoint Energy Services Co., Ltd.	A-Power Co., Ltd.	Geothermal power related business	97.09%	0%	0%	Note 6

Note 1: The entity was incorporated upon the approval on February 6, 2023. On November 11, 2024, the Company sold 51% of the entity's shares. As the Company did not hold more than half of the seats in the Board of Directors and had no decision-making right, it was assessed that the Company lost control over the entity. As a result, the consolidation ceased from the date the Company lost control. The 49% of shares were recorded as non-current assets held for sale. On January 6, 2025, the Company sold 39% of the entity's shares, and the remaining shares were recorded as financial assets at fair value through profit or loss.

Note 2: The entity completed the registration of incorporation on February 27, 2024.

Note 3: The entity completed the registration of incorporation on February 29, 2024.

Note 4: The entity completed the registration of incorporation on March 4, 2024, and the registration of capital increase was completed on December 18, 2024.

Note 5: The entity completed the registration of incorporation on April 17, 2024.

Note 6: The entity completed the registration of incorporation on May 6, 2024, and the registration of capital increase was completed on August 8, 2025. The Group acquired 97.09% share of A-Power Co., Ltd., a subsidiary of ACMEPOINT TECHNOLOGY CO., LTD.(the Group's ultimate parent company), in the third quarter of 2025, and included A-Power Co., Ltd. as a consolidated subsidiary. As this equity transaction pertains to a reorganisation of entities under common control, A-Power Co., Ltd. shall be treated as if it had always been consolidated since the beginning. Thus, the Group has retrospectively restated the prior period consolidated financial statements when preparing the comparative consolidated financial statements.

C. Subsidiaries not included in the consolidated financial statements: None.

D. Adjustments for subsidiaries with different balance sheet dates: Not applicable.

E. Significant restrictions: None.

F. Subsidiaries that have non-controlling interests that are material to the Group: None.

(4) Foreign currency translation

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in New Taiwan dollars, which is the Company's functional and the Group's presentation currency.

Foreign currency transactions and balances

- A. Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognised in profit or loss in the period in which they arise.
- B. Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognised in profit or loss.
- C. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.
- D. All foreign exchange gains and losses are presented in the statement of comprehensive income within 'other gains and losses'

(5) Classification of current and non-current items

- A. Assets that meet one of the following criteria are classified as current assets; otherwise, they are classified as non-current assets:
 - (a).Assets that are expected to be realised, or are intended to be sold or consumed the purpose of in the normal operating cycle;
 - (b).Assets that are held primarily for the purpose of trading;
 - (c).Assets that are expected to be realised within twelve months after the reporting period;
 - (d).Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to settle liabilities at least twelve months after the reporting period.
- B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise, they are classified as non-current liabilities:
 - (a) Liabilities that are expected to be settled in the normal operating cycle;
 - (b) Liabilities that are held primarily for the purpose of trading;
 - (c) Liabilities that are due to be settled within twelve months after the reporting period;

(d) It does not have the right at the end of the reporting period to defer settlement of the liability at least twelve months after the reporting period.

The operating cycle of the construction engaged by the Group is longer than one year. Therefore, the Group uses the normal operating cycle as its criterion for classifying current or non-current assets and liabilities in relation to construction business.

(6) Cash equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Time deposits that meet the definition above and are held for the purpose of meeting short-term cash commitments in operations are classified as cash equivalents.

(7) Financial assets at fair value through profit or loss

- A. Financial assets at fair value through profit or loss are financial assets that are not measured at amortised cost or fair value through other comprehensive income.
- B. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value and recognises the transaction costs in profit or loss. The Group subsequently measures the financial assets at fair value, and recognises the gain or loss in profit or loss.

(8) Financial assets at fair value through other comprehensive income

- A. Financial assets at fair value through other comprehensive income comprise equity securities which are not held for trading, and for which the Group has made an irrevocable election at initial recognition to recognise changes in fair value in other comprehensive income.
- B. On a regular way purchase or sale basis, financial assets at fair value through other comprehensive income are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. The Group subsequently measures the financial assets at fair value. The changes in fair value of equity investments that were recognised in other comprehensive income are reclassified to retained earnings and are not reclassified to profit or loss following the derecognition of the investment. Dividends are recognised as revenue when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

(9) Financial assets at amortised cost

- A. Financial assets at amortised cost are those that meet all of the following criteria:
 - (a) The objective of the Group's business model is achieved by collecting contractual cash flows.
 - (b) The assets' contractual cash flows represent solely payments of principal and interest.
- B. On a regular way purchase or sale basis, financial assets at amortised cost are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs.

Interest income from these financial assets is included in finance income using the effective interest method. A gain or loss is recognised in profit or loss when the asset is derecognised or impaired.

D. The Group's time deposits which do not fall under cash equivalents are those with a short maturity period and are measured at initial investment amount as the effect of discounting is immaterial.

(10) Accounts and notes receivable

- A. Accounts and notes receivable entitle the Group a legal right to receive consideration in exchange for transferred goods or rendered services.
- B. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(11) Impairment of financial assets

For financial assets at amortised cost, at each reporting date, the Group recognises the impairment provision for 12 months expected credit losses if there has not been a significant increase in credit risk since initial recognition or recognises the impairment provision for the lifetime expected credit losses (ECLs) if such credit risk has increased since initial recognition after taking into consideration all reasonable and verifiable information that includes forecasts. On the other hand, for accounts receivable or contract assets that do not contain a significant financing component, the Group recognises the impairment provision for lifetime ECLs.

(12) Derecognition of financial assets

The Group derecognises a financial asset when the contractual rights to receive the cash flows from the financial asset expire.

(13) Leasing arrangements (lessor) – lease receivables/ operating leases

- A. Based on the terms of a lease contract, a lease is classified as a finance lease if the lessee assumes substantially all the risks and rewards incidental to ownership of the leased asset.
 - (a) At commencement of the lease term, the lessor should record a finance lease in the balance sheet as 'lease receivables' at an amount equal to the gross investment in the lease (including initial direct costs). The difference between gross lease receivable and the present value of the receivable is recognised as 'unearned finance income of finance lease'.
 - (b) The lessor should allocate finance income over the lease term based on a systematic and rational basis reflecting a constant periodic rate of return on the lessor's net investment in the finance lease.
 - (c) Lease payments (excluding costs for services) during the lease term are applied against the gross investment in the lease to reduce both the principal and the unearned finance income.
- B. Lease income from an operating lease (net of any incentives given to the lessee) is recognised in profit or loss on a straight-line basis over the lease term.

(14) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted-average method. The cost of finished goods and work in progress comprises raw materials,

direct labour, other direct costs and related production overheads (allocated based on normal operating capacity). It excludes borrowing costs. The item by item approach is used in applying the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

(15) Non-current assets held for sale

Non-current assets are classified as assets held for sale when their carrying amount is to be recovered principally through a sale transaction rather than through continuing use, and a sale is considered highly probable. They are stated at the lower of carrying amount and fair value less costs to sell.

(16) Property, plant and equipment

- A. Property, plant and equipment are initially recorded at cost.
- B. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.
- C. Property, plant and equipment are measured at cost model subsequently. Land is not depreciated. Other property, plant and equipment are depreciated using the straight-line method over their estimated useful lives. Each part of an item of property, plant, and equipment with a cost that is significant in relation to the total cost of the item must be depreciated separately.
- D. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each financial year-end. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', from the date of the change.

The estimated useful lives of property, plant and equipment are as follows:

Buildings and structures	5 ~ 36 years
Transportation equipment	6 years
Office equipment	3 ~ 6 years
Leasehold improvements	2 ~ 4.5 years
Other equipment	3 ~ 5 years

(17) Leasing arrangements (lessee) – right-of-use assets/ lease liabilities

- A. Leases are recognised as a right-of-use asset and a corresponding lease liability at the date at which the leased asset is available for use by the Group. For short-term leases or leases of low-value assets, lease payments are recognised as an expense on a straight-line basis over the lease term.

B. Lease liabilities include the net present value of the remaining lease payments at the commencement date, discounted using the incremental borrowing interest rate. Lease payments are comprised of the following:

- (a) Fixed payments, less any lease incentives receivable;
- (b) Variable lease payments that depend on an index or a rate;
- (c) Payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

The Group subsequently measures the lease liability at amortised cost using the interest method and recognises interest expense over the lease term. The lease liability is remeasured and the amount of remeasurement is recognised as an adjustment to the right-of-use asset when there are changes in the lease term or lease payments and such changes do not arise from contract modifications.

C. At the commencement date, the right-of-use asset is stated at cost comprising the following:

- (a) The amount of the initial measurement of lease liability;
- (b) Any lease payments made at or before the commencement date;
- (c) Any initial direct costs incurred by the lessee; and
- (d) An estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

The right-of-use asset is measured subsequently using the cost model and is depreciated from the commencement date to the earlier of the end of the asset's useful life or the end of the lease term. When the lease liability is remeasured, the amount of remeasurement is recognised as an adjustment to the right-of-use asset.

D. For lease modifications that decrease the scope of the lease, the lessee shall decrease the carrying amount of the right-of-use asset and remeasure the lease liability to reflect the partial or full termination of the lease, and recognise the difference in profit or loss. For all other lease modifications, the lessee shall remeasure the lease liability and adjust the right-of-use asset, correspondingly.

(18) Intangible assets

Computer software is stated at cost and amortised on a straight-line basis over its estimated useful life of 1 to 5 years.

(19) Impairment of non-financial assets

The Group assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. When the circumstances or reasons for recognizing impairment loss for an asset in prior years no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the

depreciated or amortised historical cost would have been if the impairment had not been recognised.

(20) Borrowings

Borrowings comprise long-term and short-term bank borrowings. Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

(21) Accounts and notes payable

- A. Accounts payable are liabilities for purchases of raw materials, goods or services and notes payable are those resulting from operating and non-operating activities.
- B. The short-term accounts and notes payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(22) Derecognition of financial liabilities

A financial liability is derecognised when the obligation specified in the contract is either discharged or cancelled or expires.

(23) Provisions

Provisions (including warranties and onerous contracts) are recognised when the Group has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be reliably estimated. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation on the balance sheet date, which is discounted using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to passage of time is recognised as interest expense. Provisions are not recognised for future operating losses.

(24) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid and are recognised as expenses in the period in which the employees render service.

B. Pensions

(a) Defined contribution plans

For the defined contribution plans, the contributions are recognised as pension expense when they are due on an accrual basis. Prepaid contributions are recognised as an asset to the extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plans

i. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services in current period or prior periods. The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance

sheet date less the fair value of plan assets. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability; when there is no deep market in high-quality corporate bonds, the Group uses interest rates of government bonds (at the balance sheet date) instead.

- ii. Remeasurements arising on defined benefit plans are recognised in other comprehensive income in the period in which they arise and are recorded as other equity.
- iii. Past service costs are recognised immediately in profit or loss.
- iv. Pension cost for the interim period is calculated on a year-to-date basis by using the pension cost rate derived from the actuarial valuation at the end of the prior financial year, adjusted for significant market fluctuations since that time and for significant curtailments, settlements, or other significant one-off events. Also, the related information is disclosed accordingly.

C. Employees' compensation and directors' remuneration

Employees' compensation and directors' remuneration are recognised as expense and liability, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in estimates. If employee compensation is paid by shares, the Group calculates the number of shares based on the closing price at the previous day of the board meeting resolution.

(25) Employee share-based payment

For the equity-settled share-based payment arrangements, the employee services received are measured at the fair value of the equity instruments granted at the grant date, and are recognised as compensation cost over the vesting period, with a corresponding adjustment to equity. The fair value of the equity instruments granted shall reflect the impact of market vesting conditions and non-market vesting conditions. Compensation cost is subject to adjustment based on the service conditions that are expected to be satisfied and the estimates of the number of equity instruments that are expected to vest under the non-market vesting conditions at each balance sheet date. Ultimately, the amount of compensation cost recognised is based on the number of equity instruments that eventually vest.

(26) Income taxes

- A. The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or items recognised directly in equity, in which cases the tax is recognised in other comprehensive income or equity.
- B. The current income tax expense is calculated on the basis of the tax laws enacted or substantively

enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.

- C. Deferred tax is recognised, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated balance sheet. However, the deferred tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences. Deferred tax is provided on temporary differences arising on investments in subsidiaries, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.
- D. Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. At each balance sheet date, unrecognised and recognised deferred tax assets are reassessed.
- E. Current income tax assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. Deferred tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realise the asset and settle the liability simultaneously.
- F. The interim period income tax expense is recognised based on the estimated average annual effective income tax rate expected for the full financial year applied to the pretax income of the interim period, and the related information is disclosed accordingly.

(27) Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or stock options are shown in equity as a deduction, net of tax, from the proceeds.

(28) Dividends

Dividends are recorded in the Company's financial statements in the period in which they are resolved by the Company's shareholders. Cash dividends are recorded as liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to ordinary shares on the

effective date of new shares issuance.

(29) Revenue recognition

A. Sales of goods

- (a) The Group sells components of Solar PV system. Sales are recognised when control of the products has transferred, being when the products are delivered to the customer, the customer has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customer, and either the customer has accepted the products in accordance with the sales contract, or the Group has objective evidence that all criteria for acceptance have been satisfied.
- (b) A receivable is recognised when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

B. Sales of services

The Group provides services in relation to the development and maintenance of power generation equipment. Revenue from providing services is recognised in the accounting period in which the services are rendered. For fixed-price contracts, revenue is recognised based on the actual service provided to the end of the reporting period as a proportion of the total services to be provided. This is determined based on the proportion of services relative to the total service period.

C. Construction revenue

- (a) The Group contracted the construction of Solar PV system. Since the cost of construction is directly related to the degree of completion of the performance obligations, revenue is recognised as the proportion of the input cost to the estimated total cost.
- (b) The Group's estimate about revenue, costs and progress towards complete satisfaction of a performance obligation is subject to a revision whenever there is a change in circumstances. Any increase or decrease in revenue or costs due to an estimate revision is reflected in profit or loss during the period when the management become aware of the changes in circumstances.
- (c) The Group's revenues are gradually recognised as contract assets in proportion to the cost of construction inputs, and the contract assets are transferred to accounts receivable based on the amount that the Group has the right to issue invoice at the time that the Group issues bills to customers every month. The customer pays at the time specified in the payment schedule. If the services rendered exceed the payment, a contract asset is recognised. If the payments exceed the services rendered, a contract liability is recognised.

(30) Reorganisation of entities under common control

- A. In accordance with the IFRS Q&A 'Questions on the accounting treatment of business combination under common control' issued by Accounting Research and Development

Foundation of the R.O.C. (ARDF) on October 26, 2018, there are no definite rules for business combinations of entities under common control (or organizational restructuring) in IFRS 3, 'Business combinations'. Therefore, the Group applies the related interpretations issued in the R.O.C. to account for the intra-group reorganisation using the book value method and retrospectively restate the prior period financial statements as if the entity had always been consolidated since the beginning.

B. As described in Note 4(3)B, the Group acquired 97.09% shares of A-Power Co., Ltd., a subsidiary of the ACMEPOINT TECHNOLOGY CO., LTD. (the Group's ultimate parent company), in the third quarter of 2025. In accordance with the ARDF Interpretation 100-301, the transaction pertains to the intra-group reorganisation and accordingly the Group retrospectively restated the prior period financial statements as if the entity had always been consolidated since the beginning. The shares of equity and profit or loss attributable to original shareholder of A-Power Co., Ltd. (ACMEPOINT TECHNOLOGY CO., LTD.) were recorded as 'equity attributable to former owner of business combination under common control' and 'profit (loss), attributable to former owner of business combination under common control'.

5. Critical Accounting Judgements, Estimates and Key Sources of Assumption Uncertainty

The preparation of these consolidated financial statements requires management to make critical judgements in applying the Group's accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. Such assumptions and estimates have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year. The related information is addressed below:

(1) Critical judgements in applying the Group's accounting policies

None.

(2) Critical accounting estimates and assumptions

Recognition of construction revenue is based on the percentage of input costs to the estimated total costs. The Group relies on the project condition and objective factors to estimate total cost. The reasonableness of estimates is reviewed regularly. However, the estimated total cost will be affected by changes in the industry environment and construction status to adjust the amount of the Group's revenue recognition and the balance of contract assets and contract liabilities at the end of the period.

(16) Pensions

A. Defined contribution plan

(a). Effective July 1, 2005, the Group has established a defined contribution pension plan (the “New Plan”) under the Labor Pension Act (the “Act”), covering all regular employees with R.O.C. nationality. Under the New Plan, the Group contributes monthly an amount based on 6% of the employees’ monthly salaries and wages to the employees’ individual pension accounts at the Bureau of Labor Insurance. The benefits accrued are paid monthly or in lump sum upon termination of employment.

(b). For the aforementioned pension plan, the Group recognised pension costs of \$2,038, \$2,173, \$6,259 and \$6,516 for the three months and nine months ended September 30, 2025 and 2024, respectively.

(17) Share-based payment

A. For the nine months ended September 30, 2025 and 2024, the Group’s share-based payment arrangements were as follows:

Type of arrangement	Grant date	Quantity granted	Contract period	Vesting conditions
Employee share options	2022.10.31	2,040	5 year(s)	2~4 years' service
Cash capital increase reserved for employee preemption	2024.1.19	916	None	Immediately vested

The abovementioned share-based payment arrangements are settled by equity.

B. Details of the share-based payment arrangements are as follows:

(a) Grant date on October 31, 2022:

	Nine months ended September 30					
	2025		2024		Weighted-average	Weighted-average
	No. of options (in thousands)	exercise price (in dollars)	No. of options (in thousands)	exercise price (in dollars)

On September 7, 2023, the aforementioned cash capital increase had been approved by the Taipei Exchange. The effective date was set on January 31, 2024, and the registration for the change of capital increase was completed on February 23, 2024.

(20) Capital surplus

Pursuant to the R.O.C. Company Act, capital surplus arising from paid-in capital in excess of par value on issuance of common stocks and donations can be used to cover accumulated deficit or to issue new stocks or cash to shareholders in proportion to their share ownership, provided that the Company has no accumulated deficit. Further, the R.O.C. Securities and Exchange Act requires that the amount of capital surplus to be capitalised mentioned above should not exceed 10% of the paid-in capital each year. However, capital surplus should not be used to cover accumulated deficit unless

the legal reserve is insufficient.

(21) Retained earnings

- A. Under the Company's Articles of Incorporation, the current year's earnings, if any, shall first be used to pay all taxes and offset prior years' operating losses and then 10% of the remaining amount shall be set aside as legal reserve. The remainder, if any, to be retained or to be appropriated shall be resolved by the stockholders at the stockholders' meeting.
- B. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the distribution of the reserve is limited to the portion in excess of 25% of the Company's paid-in capital.
- C. In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings.
- D. The Company's dividend policy is summarised as below: as the Company operates in a volatile business environment and is in the stable growth stage, the residual dividend policy is adopted, taking into consideration the Company's financial structure, operating results and future expansion plans.
- E. The appropriations of 2024 and 2023 earnings as resolved by the shareholders at their meeting on June 19, 2025 and June 19, 2024, respectively, are as follows:

(32) Reorganisation of entities under common control

- A. To jointly develop the geothermal power related business and expand diversified green energy businesses, the Board of Directors of the Group resolved to allocate \$0.2 billion as a warrant premium for future priority subscription of shares in A-Power Co., Ltd., and A-Power Co., Ltd. will use these funds to cover expenses related to the geothermal development contract. Having met the conditions required by the investment agreement, the Group held 97.09% equity interests in A-Power Co., Ltd. on August 8, 2025.
- B. Because the changes in equity are considered as business combination under common control, A-Power Co., Ltd. is deemed as if it had always been consolidated since the beginning. Accordingly, the transaction was accounted for using book value method. The difference between the consideration of acquiring shares in A-Power Co., Ltd. and the net equity is recorded as capital reserve, additional paid-in capital of \$581.
- C. Because A-Power Co., Ltd. is deemed as if it had always been consolidated since the beginning, the Group recognised 'equity attributable to former owner of business combination under common control' amounting to \$6,599, which had been written off at the effective date for the share exchanges.

(1) Capital management

The Group's objectives when managing capital are planned based on factors including the environment where the Group operates, growth stages, capital requirements for future material investment plan and long-term financial plans to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and to maintain an optimal capital structure to reduce the cost of capital. The Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings less cash and cash equivalents. Total capital is calculated as 'equity' as shown in the consolidated balance sheet plus net debt.

B. Financial risk management policies

- The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk and interest rate risk), credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial position and financial performance.
- Risk management is carried out by a central treasury department (Group treasury) under policies approved by the Board of Directors. Group treasury identifies, evaluates and hedges financial risks in close co-operation with the Group's operating units.

C. Significant financial risks and degrees of financial risks

(a) Market risk

Exchange rate risk

- i. Management has set up a policy to require group units to manage their foreign exchange risk against their functional currency. The units are required to hedge their entire foreign exchange risk exposure with the Group treasury.
- ii. The Group's businesses involve some non-functional currency operations (the Group's functional currency: NTD). The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

				September 30, 2025	
				Foreign currency

USD: NTD	\$ 236	31.65	\$ 7,466
<u>Financial liabilities</u>			
<u>Monetary items</u>			
USD: NTD	235	31.65	7,436

iii. Total exchange gain, including realised and unrealised, arising from significant foreign exchange variation on the monetary items held by the Group for the three months and nine months ended September 30, 2025 and 2024, amounted to \$29, \$4, \$20 and \$44, respectively.

iv. Analysis of foreign currency market risk arising from significant foreign exchange variation:

Price risk

- i. The Group's equity securities, which are exposed to price risk, are the held financial assets at fair value through other comprehensive income. To manage its price risk arising from investments in equity securities, the Group diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits set by the Group.
- ii. The Group's investments in equity securities comprise shares issued by the domestic companies. The prices of equity securities would change due to the change of the future value of investee companies. If the prices of these equity securities had increased/decreased by 1% with all other variables held constant, other components of equity for the nine months end September 30, 2025 and 2024 would have decreased/increased by \$220 and \$205, respectively, as a result of other comprehensive income classified as equity investment at fair value through other comprehensive income.

Cash flow and fair value interest rate risk

- i. The Group's main interest rate risk arises from short-term and long-term borrowings with variable rates, which expose the Group to cash flow interest rate risk. Partial interest rate risk is offset by cash held at variable rates. For the nine months ended September 30, 2025 and 2024, the Group's borrowings at variable rates were denominated in NTD.
- ii. If the borrowing interest rate had increased by 1% with all other variables held constant, profit, net of tax for the nine months ended September 30, 2025 and 2024 would have decreased/increased by \$0 and \$810, respectively. The main factor is that changes in interest expense result in floating-rate borrowings.

(b) Credit risk

- i. Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments on the contract obligations. The main factor is that counterparties could not repay in full the accounts receivable based on the agreed terms.

ii. The Group manages their credit risk taking into consideration the entire group's concern. Only banks and financial institutions with optimal credit ratings are accepted. According to the Group's credit policy, each local entity in the Group is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the Board of Directors. The utilisation of credit limits is regularly monitored.

iii. The Group adopts the assumptions under IFRS 9, if the contract payments were past due over 30 days based on the terms, there has been a significant increase in credit risk on that instrument since initial recognition.

iv. The Group adopts the assumptions under IFRS 9, the default occurs when the contract payments are past due over 90 days.

v. The Group classifies customers' accounts receivable in accordance with credit rating of customer. The Group applies the modified approach using a provision matrix to estimate the expected credit loss.

vi. The Group used the forecastability of Taiwan Institute of Economic Research boom observation report to adjust historical and timely information to assess the default possibility of accounts receivable, notes receivable and contract assets. However, the expected loss rate of the Group's not past due and overdue notes receivable and contract assets was not material as at September 30, 2025, December 31, 2024 and September 30, 2024, respectively. On September 30, 2025, December 31, 2024 and September 30, 2024, the loss rate methodology of accounts receivable is as follows:

(c) Liquidity risk

- i. Surplus cash held by the Group over and above balance required for working capital management are transferred to the Group treasury. Group treasury invests surplus cash in interest bearing current accounts, time deposits and money market deposits, choosing instruments with appropriate maturities or sufficient liquidity to provide sufficient headroom as determined by the above-mentioned forecasts. As at September 30, 2025, December 31, 2024 and September 30, 2024, the Group held money market position of \$361,097, \$619,438 and \$252,922, respectively, that are expected to readily generate cash inflows for managing liquidity risk.
- ii. As of September 30, 2025, December 31, 2024 and September 30, 2024, the Group has undrawn borrowing facilities of \$3,391,290, \$3,421,727 and \$3,411,409, respectively.
- iii. Except for those listed in the table below, the Group's non-derivative financial liabilities will expire within 1 year. As of September 30, 2025, December 31, 2024 and September 30, 2024, the cash flows within 1 year of short-term borrowings, accounts payable and other payables are undiscounted and are in agreement with the balance of each account in the balance sheets.

(3) Fair value information

- A. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and

volume to provide pricing information on an ongoing basis.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Unobservable inputs for the asset or liability. The fair value of the Group's investment in equity investment without active market is included in Level 3.

B. Financial instruments not measured at fair value

The Group's carrying amounts of cash and cash equivalents, notes receivable, accounts receivable (including related party), other receivables, short-term borrowings, notes payable, accounts payable (including related party) and other payables are approximate to their fair values.

C. Financial and non-financial instruments measured at fair value

(a) The related information of financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities at September 30, 2025, December 31, 2024 and September 30, 2024 are as follows:

September 30, 2025	Level 1	Level 2	Level 3	Total
Assets				
<u>Recurring fair value measurements</u>				
Financial assets at fair value through profit or loss				
Equity securities	\$ -	\$ -	\$ 10,281	\$ 10,281

December 31, 2024	Level 1	Level 2	Level 3	Total
Assets				
<u>Recurring fair value measurements</u>				
Financial assets at fair value through other comprehensive income				
Equity securities	\$ -	\$ -	\$ 21,994	\$ 21,994
September 30, 2024	Level 1	Level 2	Level 3	Total
Assets				
<u>Recurring fair value measurements</u>				
Financial assets at fair value through other comprehensive income				
Equity securities	\$ -	\$ -	\$ 20,547	\$ 20,547

(b) The methods and assumptions the Group used to measure fair value are as follows:

- i. The fair value of financial instruments without active markets, is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques can be referred to current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method or other valuation methods, including calculated by applying model using market information available at the consolidated balance sheet date (i.e. yield curves on the Taipei Exchange, average commercial paper interest rates quoted from Reuters).
- ii. The output of valuation model is an estimated value and the valuation technique may not be able to capture all relevant factors of the Group's financial and non-financial instruments. Therefore, the estimated value derived using valuation model is adjusted accordingly with additional inputs, for example, model risk or liquidity risk and etc. In accordance with the Group's management policies and relevant control procedures relating to the valuation models used for fair value measurement, management believes adjustment to valuation is necessary in order to reasonably represent the fair value of financial and non-financial instruments at the consolidated balance sheet. The inputs and pricing information used during valuation are carefully assessed and adjusted based on current market conditions.
- iii. The Group takes into account adjustments for credit risks to measure the fair value of financial and non-financial instruments to reflect credit risk of the counterparty and the Group's credit quality.

D. Because the Group's equity interest in Ta-Hsi Energy Co., Ltd. decreased from 100% to 1.34%, which was recorded as financial assets at fair value through profit or loss, the Group has transferred the fair value into Level 3 at the end of the month when the event occurred.

E. Treasury segment is in charge of valuation procedures for fair value measurements being categorised within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions and frequently reviewing. Treasury segments cooperatively set up valuation policies, valuation processes and rules for measuring fair value of financial instruments and ensure compliance with the related requirements in IFRS. The related valuation results are reported to management monthly. Management is responsible for managing and reviewing valuation processes.

F. The following is the qualitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

	September 30,2025 Fair value	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity instrument:					
Unlisted shares	\$ 10,281	Market price method	Not applicable	Not applicable	Not applicable

Non-derivative equity instrument:					
Emerging stocks	\$ 21,994	Market comparable companies	Price to book ratio multiple Discount for lack of marketability	0.96 7.73%	The higher the multiple, the higher the fair value The higher the discount for lack of marketability, the lower the fair value
September 30,2024 Fair value					
	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value	
Non-derivative equity instrument:					
Emerging stocks	\$ 20,547	Market comparable companies	Price to book ratio multiple Discount for lack of marketability	1.29 6.33%	The higher the multiple, the higher the fair value The higher the discount for lack of marketability, the lower the fair value

G. The Group has carefully assessed the valuation models and assumptions used to measure fair value. However, use of different valuation models or assumptions may result in different measurement. The following is the effect of profit or loss or of other comprehensive income from financial assets and liabilities categorised within Level 3 if the inputs used to valuation models have changed:
